Integrando Web Services

Endpoints

A continuación relaciono los endpoints utilizados para la aplicación:

```
public interface EndpointsApi {
    @GET(ConstantesRestApi.URL_GET_RECENT_MEDIA_USER)
    Call<MascotaResponse> getRecentMedia();
    @GET(ConstantesRestApi.URL_GET_FOLLOWED_BY_USER)
    Call<FollowersResponse> getFollowedBy();
    @GET(ConstantesRestApi.URL_GET_FOLLOWER_MEDIA_BY_USER)
    Call<FollowerMediaResponse> getFollowerMediaBy(@Path("user-id") String userId);
}
```

getRecentMedia();

Este Endpoint permite adquirir las fotografiás del usuario administrador de la cuenta.

getFollowedBy();

Este Endpoint me permite obtener todos los usuarios que siguen mi cuenta instagram.

```
getFollowerMediaBy(@Path("user-id") String userId);
```

Este Endpoint me permite traer las fotos mas recientes de los usuarios con permisos sambox.

Pantallas de la Aplicación Peta Retro

Resumen del Proyecto.
